

Summary of Participant Communication Poll

Respondents

On 7 February 2022, invitations were sent to approximately 1,600 participants (900 participants living in PFAS affected communities, 700 participants living in comparison communities). 290 responses were received.

Table 1. Response rate to the participant communication poll by place of current residence

Place of residence	Sent	Responded	Response rate (%)
Katherine	161	24	14.9
Oakey	28	10	35.7
Williamtown	82	36	43.9
Alice Springs	178	29	16.3
Dalby	141	25	17.7
Kiama and Shellharbour	349	83	23.8
Other	685	83	12.1
Total	1624	290	17.9

Further communication

Q2. Are you interested in further communication from the PFAS Health Study team?

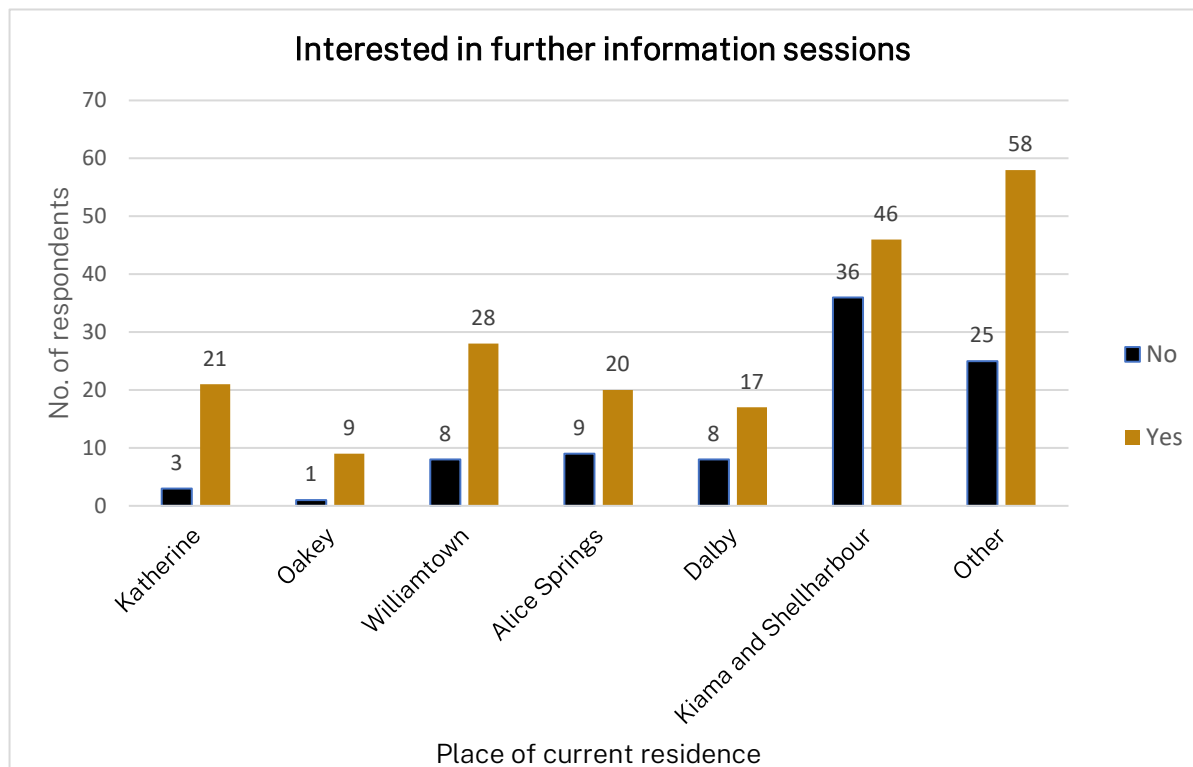

Figure 1. Number of participants interested in further communication from the PFAS Health Study, by place of current residence.

Type of communication

Q3. How would you prefer to receive this communication?
